Nashville District Corps of Engineers Enters the Blogosphere

NASHVILLE, TENN., August 4, 2008 – Close behind its big red “rumor button” online, the Nashville District of the U.S. Army Corps of Engineers is launching another social communication tool -- a blog.

The Nashville District *Corps-E-spondence* blog belongs to the District Engineer and Commander, Lt. Colonel Bernard Lindstrom. Lindstrom is seeking to use his blog to talk with the Corps' public customers on a variety of subjects, and have them talk with the Corps one-on-one.

Some of the subjects the District Engineer foresees being discussed are the Wolf Creek and Center Hill dams, flood control and flood maps, river and dam tailwater flows, and anything else the public has on its mind.

The Nashville District is the first Corps District in the United States to post a blog. It can be found at https://eportal.usace.army.mil/sites/LRN_Blog/default.aspx

For more information, contact the Public Affairs Office, Nashville District, Corps of Engineers, at 615-736-7161.
